

Jonah Byther

Seattle, Washington. jonahbyther.github.io. bytherj@spu.edu. linkedin.com/in/jonah-byther/.

Qualifications

- Fluent in C++ and have learned JavaScript/HTML, Python, Rust and R, and have been taught how to learn other programming languages efficiently
- Relevant Courses: Software Engineering I/II, Algorithms Design and Analysis, Database Management, Operating Systems, Computer Architecture, Data and Society
- Studied in CISCO classes that trained me in CCNA and CCNP
- AWS Certified Developer Associate Certification
- Fast learner, and I can learn anything asked of me, and I am great at following directions
- Able to look at things from many different perspectives, including other people's perspectives

Education

Bachelor of Science, Computer Science,

expected graduation June 2025

Seattle Pacific University, Seattle, WA

- Math and Data Analytics minor | GPA: 3.66
- Made Dean's list multiple times
- Completed full year of calculus and physics
- Balanced school life with 20+ hour per week work life

Professional Experience

Produce Clerk,

July 2022-Current

Safeway, Bellevue and Seattle, WA

- Paid great attention to detail, and efficiently made all the produce display nicely
- Experience with provisioning and allocating ingredients to allow for successful operations
- Stayed late if needed to and came earlier if needed to
- Trusted with ordering the salads to make sure they were always full
- Walked with the customer to needed item instead of pointing in a direction

Relevant Experience

Senior Software Engineering courses,

September 2024-June 2025

Seattle Pacific University, Seattle, WA

- Collaborated with a team of Mechanical Engineers to design a mini forklift robot
- Implemented Lidar, Slam-Toolbox, and Nav2 using ROS2 on a raspberry pi for autonomous movement
- Leveraged Lidar and ROS2 packages to display to a screen of a mapped-out room
- Participated in weekly meetings with professors and engineering students
- Built many projects throughout school experience, all in portfolio
